Rich

I won't be able to make the call but I will work on getting you some input on the RAD data if I can get my computer to start functioning.

Ralph

If you won't mind... there is going to be a conference call tomorrow morning at 10 am. If you could fit it in, I think it could really help things out...

Rich

We did take a look at the RAD data and found nothing of interest. Everything was below drinking water criteria as I recall but I can check again.

Ralph, I kind of forgot about your assessment of the rad data from Dimock. Did you ever get all the data and review it? If so what were your thoughts?
